See next page for course descriptions and enrollment information.

Environmental Compliance Webinar Descriptions

SPCC Plans for APSA Sites Webinar: Designed for facilities that store > 1,320 gallons of petroleum products (fuels, oils, solvents, etc.) in aboveground tanks, this 2-hour course covers regulated facilities and materials, state statutes, recordkeeping, training requirements, and Spill Prevention, Control, and Countermeasure Plans.

Hazardous Materials Business Plans / CERS Webinar: This 4-hour program covers applicability, completion, submittal, and employee training requirements for facilities that are required to prepare a Hazardous Materials Business Plan because they store hazardous materials at their facility. The program includes navigating and using the California Environmental Reporting System (CERS).

Basic Hazardous Waste Management Webinar: This 4-hour course provides a general overview of the basics of hazardous waste management for California hazardous waste generators. Training covers waste identification, container and tank management requirements for large and small quantity generators, basic hazardous waste shipping requirements, and the management of contaminated containers and universal waste.

Advanced Hazardous Waste Management Webinar: The advanced program is an 8-hour course that goes beyond basic hazardous waste training by expanding upon those topics covered in the basic program and including hazardous waste recordkeeping requirements, waste identification and classification, land disposal restrictions, and tiered permitting requirements for waste treatment.

UST Owner/Operator Webinar: This 4-hour course covers the responsibilities of owners and operators of facilities with underground storage tanks.

Universal Waste Management Webinar: This 2-hour course covers identification of universal waste, spill response, and proper storage, labeling, shipping, recycling, and recordkeeping requirements.
